

A woman with long brown hair, wearing a white sleeveless dress, stands on a grassy mountain peak. She is holding a large, flowing blue cloth high above her head with both hands. The background shows a vast, hazy mountain landscape under a bright, hazy sky. The image has a soft, ethereal quality with a blue gradient overlay on the right side.

Mobile Spirometers & Co Meters from Primary to Home Care

Micro Medical

Which Micro Medical Spirometer to choose?

Index

Micro I™	3
PulmoLife	3
MicroPeak (EU & ATS)	3
MicroLab	4
SpiroUSB	4
Spirometry PC Software (SPCS)	4
Micro CO	5
MicroRPM	5
Puma	5
Consumables	6
Spirometer Indices Matrix	7

The Global Lung Initiative (GLI), are the first set of global multi-ethnic predicted values for spirometry that spans an age range of 3 to 95 years. Their use in spirometry has been advocated by many global organisations.

Micro I™

- Choice of up to 9 indices can be recorded
- Choice of predicted value including GLI
- PC configuration for user specific preferences and PDF report
- ATS/ERS quality prompt for each test
- Results can be configured and displayed as – % of predicted, standard deviation (SD) or z Scores

PulmoLife

- Quick and easy screening device for early diagnosis of COPD
- Suitable for:
 - FEV₁ – the measurement of choice in COPD screening
 - Lung age interpretation – meaningful and powerful information for the patient
 - Encouraging susceptible smokers to quit
- Low cost
- Measures and displays FEV₁ and FEV₁%

MicroPeak (ATS & EU)

- The Peak Flow Meter with an immaculate pedigree
- First class design pedigree
- High visibility EU or ATS scale
- Wash-proof colour-zone asthma management system
- Built-in check valve
- Fully customisable for promotional purposes
- Easily cleaned

MicroLab

- Fully compliant to ATS/ERS 2005
- Standard colour touch-screen
- 41 inspiratory and expiratory indices measurable
- On-screen graphical child incentive device
- Numerous predicted values incl. GLI and languages selectable
- Optional software (SPCS)
- Bronchodilator and/or steroid assessment

SpiroUSB

- USB interface
- Simply plug – click – blow
- 50 spirometry parameters
- No batteries required
- Optional diagnostic and interpretation software

Spirometry PC Software (SPCS)

- Intelligence for spirometry
- Individual patient selection for easier testing and workflow
- Quality grading of blow performance
- Pre and post bronchodilator comparisons
- Real time display of manoeuvres
- Lung age calculation and textual interpretation based on ATS, NICE or Enright recommendations
- Windows 8 and 10
- Choice of four animated incentives

Micro CO

- An advanced test for the detection of cigarette consumption
- Results displayed in PPM and %COHB
- Breath-hold countdown timer
- Auto-zero function for rapid testing
- Easy to use, clean and maintain
- Audible warning for high CO levels
- Colour light indicators

MicroRPM

- Simple tests for Respiratory Muscle Strength
- Combined, mouth (MIP/MEP) and nasal pressure (SNIP) measurements
- Small, portable and lightweight
- Optional Puma, PC Software package

Puma

- Optional respiratory pressure PC software for the MicroRPM
- Complete database management and analysis software
- Real-time pressure graphs for P_lmax, P_emax and SNIP
- Pre and post medication/exercise facility
- Child incentive animation
- Choice of predicted values

Consumables

- ✓ Disposable or multiple use nose clips
- ✓ Disposable one-way safety mouthpieces
- ✓ Paediatric disposable mouthpieces
- ✓ MicroGard II bacterial Filter/kit solution
- ✓ Adult disposable mouthpieces
- ✓ Adult mouthpiece dispenser pack
- ✓ Sterilising solution
- ✓ Thermal printer paper
- ✓ Nasal probes, 4 sizes
- ✓ MicroCO disposable mouthpieces
- ✓ Rubber flanged mouthpiece
- ✓ Expiration/Inspiration pressure valve
- ✓ MicroRPM filters

Do you know?

Cleaning cycle of the turbine can be reduced to 3 month by using the comprehensive MicroGard II Filter and Filter kits*.

* based on the Bio Burden DIN EN ISO 11737-1: Report 18AA0088
